Dear Stakeholder,

New Case in Scotland

- Highly pathogenic avian influenza (HPAI) H5N1 was confirmed in commercial poultry on 18 November 2022 at a [premises near Banff, Aberdeenshire, Scotland \(AIV2022/208\)](#). A 3km protection zone and 10km surveillance zone are in place around the premises (zones in force from 18:10 on the 18 November 2022). All poultry on the premises will be humanely culled.

New Case in England

- Highly pathogenic avian influenza (HPAI) H5N1 was confirmed in commercial poultry on 18 November 2022 at a [premises near Leyburn, Richmondshire, North Yorkshire, England \(AIV2022/207\)](#). A 3km protection zone and 10km surveillance zone are in place around the premises (zones in force from 17:00 on the 18 November 2022). All poultry on the premises will be humanely culled.

Case Update in England

- Following successful completion of disease control activities and surveillance within the zone surrounding the [premises near Easingwold, Hambleton, North Yorkshire \(AIV2022/78\)](#), the 10km surveillance zone has been revoked (effective from 14:00 on the 17 November 2022). While local movement restrictions have been lifted surrounding this premises the [AIPZ including mandatory housing](#) remains in force in the area.

Keepers can check where disease control zones and regional AIPZs are located in GB and if they are in a zone on the [Animal and Plant Health Agency \(APHA\) interactive map](#), and in Northern Ireland on [DAERA's interactive map](#).

High standards of biosecurity must be maintained by all keepers as good practice for the health and welfare of their birds. Good biosecurity is an essential defence against diseases such as avian influenza and is key to limiting the spread of avian influenza in an outbreak.

An Avian Influenza Prevention Zone (AIPZ) is in force across the UK. Separate AIPZ declarations have been made in each UK administration: [England](#), [Scotland](#), [Wales](#) and [Northern Ireland](#). In addition, as of 7 November 2022 [mandatory housing measures](#) are in force across the whole of England as an additional measure in the all England AIPZ

- In these areas it is a legal requirement for all bird keepers (whether they have pet birds, commercial flocks or just a few birds in a backyard flock) to follow strict biosecurity measures in order to limit the spread of and eradicate the disease.
- In addition, in areas where mandatory housing measures are in force, it is a legal requirement for all bird keepers to keep their birds indoors.
- Definitive requirements are set out in the relevant AIPZ Declarations.
- Biosecurity guidance and a biosecurity self-assessment checklist have been published by Defra to assist all bird keepers in instigating and maintaining good biosecurity including compliance with the mandatory AIPZ measures which, together with further updates on the latest avian influenza situation, can be found via gov.uk/bird-flu

Keepers must keep a close watch on their birds for any signs of disease, and seek prompt advice from a vet if they have any concerns. Clinical signs indicative of avian influenza must be reported in England to Defra

Rural Services Helpline on 03000 200 301. In Wales, contact 0300 303 8268. In Scotland, contact to the [local Field Services Office](#). Failure to do so is an offence.

For further information on these cases and details of the measures that apply in the disease control zones currently in force see:

England: <https://www.gov.uk/animal-disease-cases-england>

Wales: <https://gov.wales/avian-influenza-bird-flu-latest-update>

Scotland: <https://www.gov.scot/publications/avian-influenza-bird-flu/>

Northern Ireland: <https://www.daera-ni.gov.uk/articles/avian-influenza-ai>

To receive immediate notification of new cases and updated zones in GB please sign up to the APHA's Animal Disease alert subscription service further details can be found at <https://www.gov.uk/guidance/apha-alert-subscription-service>

Outbreak Case Summary

In summary, the following cases of avian influenza have been confirmed in the UK:

- England
 - 114 cases of HPAI H5N1 in 2022/2023
 - 134 cases of HPAI H5N1 in 2021/2022
- Scotland:
 - 7 cases of HPAI H5N1 in 2022/2023
 - 11 cases of HPAI H5N1 in 2021/2022
- Wales:
 - 3 cases of HPAI H5N1 in 2022/2023
 - 7 cases of HPAI H5N1 in 2021/2022
- Northern Ireland:
 - 1 case of HPAI H5N1 in 2022/2023
 - 6 cases of HPAI H5N1 in 2021/2022

This is now the largest ever UK outbreak of avian influenza (prior to this the largest number of cases was 26 cases in 2020/2021 and 13 cases in 2016/2017).

APHA publish a report (updated weekly) on [findings of HPAI in wild birds in Great Britain](#) and further information on reports of avian influenza in wild bird in Great Britain and across Europe are available via APHAs [outbreak assessments](#). With guidance on wild bird incidents available through the [Mitigation Strategy for Avian Influenza in Wild Birds in England and Wales](#)

Please email edc.outbreak.comms@defra.gov.uk if you wish to be removed from this distribution list.

Kind regards,

Dr Lara Harrup
